🧐 FAQs!

Why are we learning Vanilla JS?

🧐 **FAQs!**

Why are we learning Vanilla JS?

Because fundamentals are critical!

🍔 Let's Demo Together!

We're going to build a form to collect

Let's build a simple form for a communication tool that:

- Says "Please invite your friends to join CSE" at the top
- Has a textarea with a welcome message. Once the number of characters exceeds 10, make the background red until there is less than 10 characters in there.
- Has an input for an email address, with an "Add more" button at the end that populates more another field until you reach 10 addresses.
- Has a submit button that when clicked, provides a summary screen, before allowing the user to cancel or continue.
- Style with tailwind as a component library, considering responsiveness
